

TREE LIGHTING GUIDE

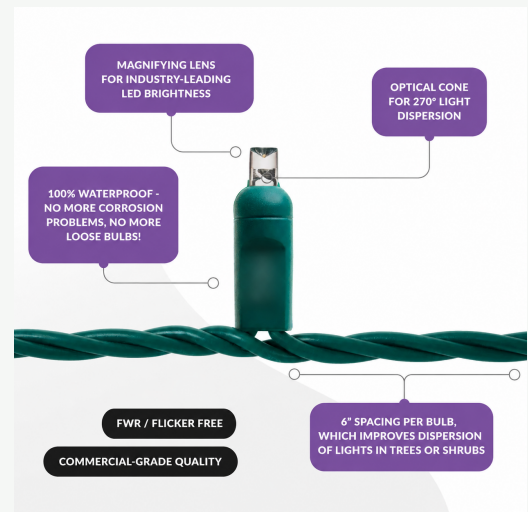

Why We Use Contractor-Grade Lights

Our contractor-grade strands cost more upfront than retail lights, but they are built for reliable, multi-season outdoor use. After years of dealing with failed strands, corrosion and loose connections from retail-grade products, we now only sell lights we are comfortable standing behind.

Built for professional tree installations

- Waterproof, sealed one-piece lamp sockets help prevent corrosion and loose bulbs.
- Screw-together coaxial connections with rubber O-rings create a secure, watertight seal.
- Connections resist pulling apart from wind, snow and movement in the tree.
- UV-protected materials are designed for long-term outdoor exposure.
- Full Wave Rectifier technology provides bright, consistent, flicker-free lighting.
- Commercial-grade construction is designed for Calgary's cold, snow and changing weather.

COMMERCIAL-GRADE CONSTRUCTION

Secure coaxial connections

Threaded connections screw together instead of simply plugging in, helping keep strands connected and protected from moisture.

Prefer to supply your own lights?

Absolutely. We can install client-supplied lights if they meet the requirements in your estimate. We simply cannot warranty customer-supplied strands.

COLOUR + TWINKLE OPTIONS

Choose the Look for Your Tree

All of our tree strands come in a solid colour or one of the combinations below. Twinkle options are intentionally subtle - approximately every 7th bulb twinkles.

CLASSIC + TWINKLE

- Warm white
- Bright white
- Warm white + warm white twinkle
- Warm white + bright white twinkle
- Bright white + bright white twinkle
- Multicolour + bright white twinkle
red, green, yellow, blue, orange + purple

SUBTLE TWINKLE

Only a small portion of the strand twinkles, creating movement and sparkle without making the whole tree flash.

COLOUR COMBINATIONS

- Red / green
- Red / bright white
- Red / warm white
- Blue / pure white
- Blue / teal / pure white
- Red / fuchsia / warm white
- Green / purple
- Orange / purple
- Fuchsia / teal / warm white

See the colours and twinkle in action

The house-bulb photos use larger bulbs, but the colours are the same as our tree-light strands.

Not sure what will look best?

We are happy to recommend a combination for your tree or arrange for you to see a sample in person before deciding.
